

DELTA Series LLD Water-Cooled Genset

LLD 410

50 Hz; 1500 r/min; power outputs: 33 kVA
60 Hz; 1800 r/min; power outputs: 39 kVA

Water-cooled mounted genset with electronic control module

Choice of:

- ✓ 50 Hz, 1500 r/min or 60 Hz, 1800 r/min
- ✓ Lister Petter DELTA Series water-cooled engine
- ✓ open set (LLD 410) or acoustic set (LLD 410A)

Standard Features

- control system with electronic digital control module (for features see page 3)
- single-bearing, 4-pole brushless alternator
- 95-litre integral fuel tank with contents gauge
- black steel base-plate
- anti-vibration mountings
- 12 V starter battery and leads
- mechanical governing
- output circuit breaker
- emergency stop button (lock-down type)
- high engine temperature and low oil pressure shutdown system
- pusher fan
- Operators' Handbook
- electrical diagram

Open Sets Only:

- engine-mounted exhaust silencer

Open Set (LLD 410)

Acoustic Sets Only:

- acoustic canopy
- residential exhaust silencer
- external emergency stop button

Acoustic Set (LLD 410A)

LLD (DELTA) Water-Cooled Genset Technical Data Sheet

Power Outputs				
50 Hz 1500 r/min				
			Three-Phase ¹	
Model	Engine	Rating	kVA	kW
LLD 410 LLD 410A	DWS4	Prime	30.0	24.0
		Standby	33.0	26.4
Voltages available: three-phase 380/220, 400/230, 415/240. ²				
60 Hz 1800 r/min				
			Three-phase ¹	
Model	Engine	Rating	kVA	kW
LLD 410 LLD 410A	DWS4	Prime	36.0	28.8
		Standby	39.6	31.7
Voltages available: three-phase 220/127, 230/133. ²				

1. **Power Factor:** Three-phase, 0.8 pf. Single-phase versions available on request.

2. **Voltages available:** Other voltages are available on request.

Power outputs are based on the optimum make of alternator for the set.

Rating Definitions to ISO 8528-1

All ratings are in accordance with ISO 8528-1.

Rating Conditions

A standard generating set is designed to operate in environmental reference conditions of 25 °C, 100 kPa and 30% humidity.

Prime Power

This rating is for the supply of continuous electrical power (at variable load). There is no limit on the annual hours of operation and 10% overload power can be supplied for 1 hour in 12.

Standby Power

This rating is for the supply of continuous electrical power (at variable load) in the event of a utility power failure. No overload is permitted.

Optional Items:

- residential exhaust silencer for open sets (as fitted to acoustic sets)
- 2-wheel trailer
- basic tool kit

Engine Specification

- Lister Petter DELTA Series diesel engine
- water-cooled
- indirect injection
- naturally aspirated
- four cylinders
- medium-duty cyclonic air cleaner
- oil and fuel filters
- fuel-lift pump
- 12 V electric starting system with battery-charge alternator

Alternator Specification

- single-bearing, 4-pole brushless alternator
- solid state AVR with $\pm 1.5\%$ voltage regulation as standard
- class "H" insulation on the rotor and stator, IP23 protection class

Approximate Fuel Consumption				
			Litres/Hour	
			50 Hz	60 Hz
Model	Engine	Load	1500 Tr/mn	1800 Tr/mn
LLD (410A)	DWS4	100%	8.6	10.3
		75%	6.3	7.4

Sound Pressure Levels (dBA) ²	
50 Hz, 1500 r/min	
Acoustic genset	dBA at 75% load, 7m
LLD 410A	70

2. Noise levels are in accordance with European Noise Directive 2001/14/EC.

Control System Features

Control Cubicle

All LLD and LLDA sets have a control cubicle mounted on a vibration-isolated support, which has the following features:

- electronic digital control module with monitoring/control facility and warning indicators
- automatic shutdown protection
- emergency stop button (lock-down type)
- AC output circuit breaker with over-current protection
- DC circuit control switch and overload circuit breaker

The control module gives digital readouts of:

- generator voltage (phase-to-phase and phase-to-neutral)
- generator current (each phase displayed separately)
- output frequency
- engine speed
- engine oil pressure
- engine coolant temperature
- battery voltage
- engine hours run

The control module has indicators for:

- overspeed/underspeed
- emergency stop
- engine oil pressure
- engine temperature
- failure to start
- battery charger failure

Automatic shutdown occurs under:

- low engine oil pressure
- high engine temperature
- overspeed/underspeed
- failure to start after three attempts

Manual/Remote Start Sets

These sets have the flexibility of either manual or remote automatic operation:

- manual operation is by **START** and **STOP** push-buttons on the control module
- remote operation is achieved by connecting a 2-wire circuit to the relevant terminals on the control module and is activated by setting the control module to **AUTO**

Automatic Mains Failure Sets (AMF)

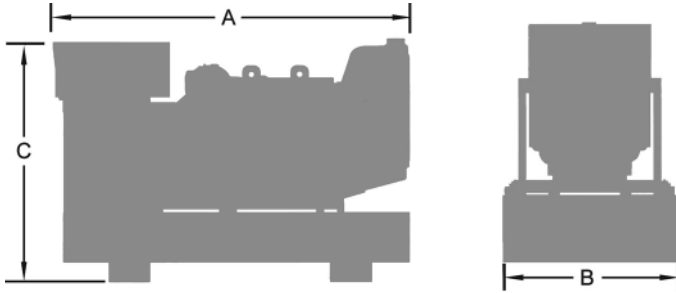

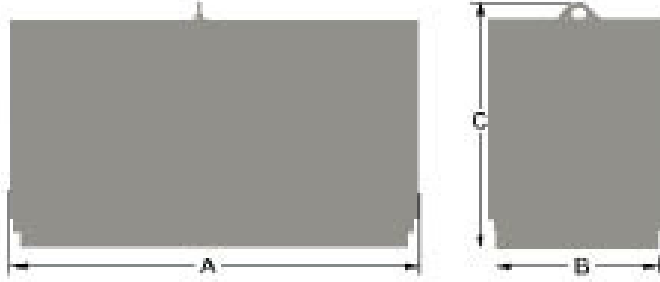

In the event of a mains failure, the generating set will automatically operate to supply the electrical load. In addition to the standard features, automatic mains failure sets have:

- wall-mounted cubicle governing automatic mains failure operation
- control module timer circuits set to delay start, delay transfer back to mains and delay stop to allow for engine cooldown
- solid-state automatic battery charger that maintains charge when set is not running

The wall-mounted cubicle features:

- mains monitoring unit to control set operation
- load-transfer contactors, mechanically and electrically interlocked (rated for set output)
- indicator for mains-on-load or plant-on-load
