

# **Portable Compressors**

### **MOBILAIR® M 13 – M 350**

With the world-renowned SIGMA PROFILE Flow rate 1.2 to 34.0 m<sup>3</sup>/min (42 – 1200 cfm)

## **MOBILAIR – KAESER** quality and efficiency for every need

#### Compressed air as a versatile energy source

With a century of experience in machine construction and engineering, KAESER KOMPRESSOREN is one of the world's leading compressor manufacturers and compressed air systems providers. KAESER's comprehensive range of products and services ensures that all compressed air users can find a solution that meets their exact requirements.

#### **Made in Germany**

The numerous different models of the MOBILAIR range of portable compressors are all manufactured at KAESER's headquarters in Coburg, Northern Bavaria. Equipped with the very latest technology, the recently modernised portable compressor plant boasts state-of-the-art equipment, including a sound testing area certified by the TÜV (German Technical Inspection Agency) for free-field sound level measurement, a complete powder-coating facility and highly efficient manufacturing logistics.

### **SIGMA PROFILE**

Every KAESER rotary screw airend is equipped with energy-saving SIGMA PROFILE rotors. Meticulous manufacturing and precision-aligned anti-friction bearings guarantee long service life and maximum reliability.

### Service-friendly and easy to access

MOBILAIR portable compressors are simple to operate and allow excellent component accessibility. This makes service work fast and efficient. Customised service contracts are also available upon request.

## **KAESER** product portfolio

Compressed air system solutions for every application

## **Compact powerhouses**

with petrol engines up to 15 bar

Even the smallest MOBILAIR compressors are more than capable of powering pneumatic spades, breakers, drills, saws, grinders, impact wrenches and impact moles. The 15-bar version is the ideal choice when it comes to trenchless fibre-optic cable laying or leakage tests. Available options include an external aftercooler for delivering cool, condensate-free compressed air or a filter combination for technically oil-free compressed air.

MOBILAIR M 13 with external filter combination

## **Portable compressors**

with the patented Anti-Frost Control

Just like their larger counterparts, MOBILAIR portable compressors with flow rates ranging from 2 to 5.6 m<sup>3</sup>/min ensure dependable performance even in cold conditions: KAESER's patented Anti-Frost Control automatically adjusts operating temperature according to ambient temperature. Together with the optional tool lubricator, this not only prevents air tools from freezing, but also extends their service life and availability.

## **Exceptional power and versatility**

Compressed air and more...

The MOBILAIR portable compressors in this product range are exceptionally versatile. Optionally available with synchronous generators and/or compressed air treatment components, they are also offered in various maximum pressure variants, thereby ensuring that there is always an appropriate model available, whatever the application may be.

## **Efficiency and performance**

with SIGMA CONTROL SMART or SIGMA CONTROL MOBIL

Available for MOBILAIR compressors with flow rates up to 34.0 m<sup>3</sup>/min, the innovative SIGMA CONTROL SMART and SIGMA CONTROL MOBIL compressor controllers are simple to use and, by precisely matching motor power to the compressed air components, significantly enhance fuel efficiency.

MOBILAIR M 350

### e-power

The alternative, emissions-free drive for portable compressors

The new M 27E, M 31E and M 50E portable compressors truly come into their own wherever an electrical power connection is available. Their near-silent electric drive makes them the perfect choice for use in low emission and noise protection zones. The effects of noise from compressed air applications in tunnels or inside buildings are tamed by the compressors' emissions-free drive.

The M 250E and M255E stationary versions are designed for permanent outdoor operation in ever-changing locations

### **MOBILAIR** accessories

- Electrical connection cable to towing vehicle and adapter (7 and 13 pole, 12 and 24 V)
- 50 mm ball couplings and towing eyes available with diameters of 45, 68 and 76 mm
- · Various hose lines (separate or integrated with claw couplings)
- Hose lubricator
- · Centrifugal separator on support stand, optionally available with 4-I tool lubricator
- · Fluids and lubricants
- · Filter sets for regular maintenance

### **Genuine KAESER parts**

As with all KAESER products, consumables and spare parts are quality-tested to ensure best possible performance. You can rest assured that all components are guaranteed and designed to meet the demands of the applicable operating conditions.

## The world is our home

As one of the world's largest compressed air system providers and compressor manufacturers, KAESER KOMPRESSOREN is represented throughout the world by a comprehensive network of branches, subsidiary companies and authorised partners in over 100 countries.

With innovative products and services, KAESER KOMPRESSOREN's experienced consultants and engineers help customers to enhance their competitive edge by working in close partnership to develop progressive system concepts that continuously push the boundaries of performance and compressed air efficiency.

Moreover, the decades of knowledge and expertise from this industry-leading system provider are made available to each and every customer via the KAESER group's global computer network.

These advantages, coupled with KAESER's worldwide service organisation, ensure that every product operates at the peak of its performance at all times and provides maximum availability.
